Ex i field circuit ISpac

9143/10-114-200-10s Art. No. 280055

- To provide 3- or 4-wire transmitters, solenoid valves, light barriers etc. with intrinsically safe power
- Stable, adjustable output voltage
- Additional switching input for control via binary output
- International approvals for global use

MY R. STAHL 9143B

The Series 9143 compact Ex i power supply is used to provide field devices , e.g. 3- or 4-wire transmitters, solenoid valves, light barriers with intrinsically safe power. It delivers a stable output voltage via intrinsically safe outputs. The additional switching input allows the Ex i power supply to be controlled by binary outputs from a PLC or DCS.
