Ex i field circuit

9172/22-11-00s Art. No. 169653

- Binary input or output with two channels
- For separating intrinsically safe and non-intrinsically safe signal and control circuits
- For use up to SIL 2 (IEC/EN 61508)

MY R. STAHL 9172A

The Series 9172 relay module separates intrinsically safe and non-intrinsically safe binary signal and control circuits. To do this, it makes intrinsically safe binary inputs and outputs with two channels available. Depending on the version, the device has either an intrinsically safe control system or an intrinsically safe output contact, and can therefore be used as an output or input isolator.
