MY R. STAHL 8494A

The **8494 product series** is a range of 25 W or 15 W loudspeakers designed for use in hazardous and harsh environments. These are unique as they are constructed using antistatic polyamide which provides a lightweight, robust, corrosion-resistant enclosure. For ultimate flexibility, wattage, impedance and transformer variants with 25, 15, 6.5, 5, 2.5 and 1.5 W connections are available. The variant with the short trumpet comes in a compact enclosure and provides wide sound distribution. The variant with the long trumpet provides an increased sound pressure level and improved audibility.
