

Disc M16 RF316 Art. No. 336338

- Material: Stainless steel AISI 316 (EN 1.4401)
- Tooth type: Internal serrated
- Use case: Grounding washer for cable glands
- Dimensions: For M20 glands – inner Ø ~20 mm, outer Ø ~26 mm
- Corrosion-resistant: Designed for offshore and industrial settings
- Standard compliance: Suitable for Zone 1 and Zone 2 when used as part of certified cable gland assemblies
- Mounting type: Screw-on (for threaded fittings)
- Reusable & vibration-resistant

MY R. STAHL TWA

The serrated washer, made of AISI 316 stainless steel, ensures reliable grounding and mechanical fastening in harsh industrial and offshore environments. Its internal teeth bite into metal surfaces, enhancing conductivity and preventing loosening caused by vibration.

Made from acid-resistant stainless steel (EN 1.4401), this washer offers long-lasting performance in corrosive atmospheres, including marine and chemical processing applications. It is typically used with cable glands and lock nuts to maintain electrical continuity and mechanical stability.
