MY R. STAHL

The LogiLink KVM console with an integrated TFT monitor is a device for monitoring and controlling servers in data centres. It can be used directly at the server rack, in server rooms, or in other environments where space is limited. This sleek, 17-inch rack-mountable unit is very easy to pull out and open. The sturdy, enclosed housing requires only one height unit in the server rack.

Technical Data

General	
Version	Network cabinet solution
Description	Control board, rack mount
Electrical Data	
Power supply	100 – 240 VAC
Interfaces	2x USB
Interface PS/2	via adapter cable
