- For single or redundant power supply to FOUNDATION Fieldbus H1 segments (High Power Trunk)
- Output > 28 V, up to 1 A, galvanically separated
- Integrated advanced physical layer diagnostics

## MY R. STAHL 9412A

Single or redundant Series 9412 fieldbus power supply units are used to provide an FF H1 high-power trunk with up to 28 V/500 mA, and up to 1 A in Boost mode. In the background, they measure the advanced physical layer parameters, which can be reported via an Android smartphone or online via FF H1. 9419 bus-Carriers or DIN rails can be used for installation.
