

Switch Barox 8TX+ 2SFP L3 RY-LGSP23-10G Art. No. 273632

- Integrated cyber security and high user-friendliness
- Maintenance of PoE power supply, active monitoring of the camera
- Active integration of the switch into VMS and PSIM systems
- Active monitoring and management of the video network via the DMS

MY R. STAHL

Why Barox?

Barox specifically tailors the features of its products to meet the high demands of video and security networks. This offers planners, installers and users many practical advantages.

This Layer 2/3 switch with extensive Layer 3 functions is designed for applications with high data loads, such as Video over IP and video streaming, including in conjunction with multicast. PoE allows IP cameras to be powered via the data cable. The compact design and reduced number of ports make this switch ideal for smaller installations or as a remote unit within a larger network. With its extensive management capabilities, even complex network requirements can be met.

Technical Data

General	
Version	Network switch with PoE
Description	CCTV switch, L2/L3 manageable, ring-capable and DMS
Electrical Data	
Power supply	100 – 240 VAC, 50 – 60 Hz
Power consumption	max. 40 W (without PoE) / 170 W (with PoE)
Ambient Conditions	
Temperature range	0 °C to +40 °C
Mechanical Data	
Dimensions (WxHxD)	220 mm x 44 mm x 243 mm
Weight	2.4 kg
Weight	5.29 lb
