

360° AT A GLANCE

Explosion protection has countless facets – but in the end only one thing counts: seamless safety. To guarantee this, we offer you a wide range of expertise under one roof. For example, our Academy of Applied Expertise, which takes care of knowledge transfer.

Our Lifecycle Consultancy, which evaluates, manages and optimises your explosion protection. Or our applications experts, who find tailor-made solutions for special requirements.

GLOBALLY FOR YOU ON SITE

With us as your partner, you benefit in two ways. On the one hand, from our high organisational standards as a global market leader. On the other hand, you also benefit from the local know-how of our expert teams in the individual markets.

This global interplay of unique specialist knowledge and extreme quality standards ensures that we always find the perfect solution for your explosion protection requirements.

Customer Solutions on the web:

#STAHL4EXPERTISE

OUR RESPONSIBILITY

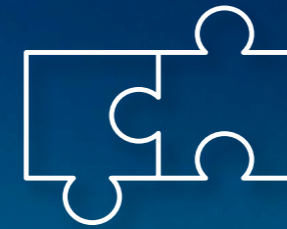

Safety knows no compromises. As a leading one-stop provider along the entire lifecycle, we see it as our responsibility to offer you modern and future-proof explosion protection. From **theory** to **practice**. From knowledge transfer to the implementation of the latest technologies. From independent consulting and risk assessment to customised application development.

OUR PROMISE

No matter how confusing the variety of technology options and digitisation trends may seem: together with our Customer Solutions experts, you will always know the bigger picture. In this way, you remain flexible no matter the challenge and master all upcoming transformations with the necessary safety – and with R. STAHL's quality guarantee.

OUR ADVANTAGE

In order to live up to our responsibility, we have bundled our expertise in **consulting, engineering** and the transfer of practical know-how under the umbrella of Customer Solutions. A **360° service** that is unique in the industry, with the clear aim of meeting your explosion protection requirements holistically and reducing potentially explosive atmospheres in a smart way.

APPLICATIONS

ACADEMY

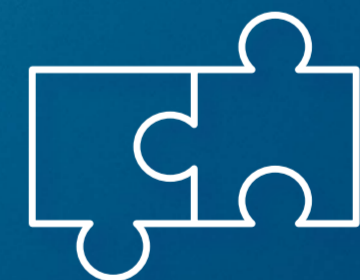

**LIFECYCLE
CONSULTANCY**

THE STRONGEST LINK.

ALL-ROUND PROTECTION

Combining the three areas – the Academy, Lifecycle Consultancy and Applications – ensures that you as a partner receive our expertise tailored to your needs. In cooperation with you, this results in seamless explosion protection.

ACADEMY OF APPLIED EXPERTISE

We live in a world of rapid progress. As the industry's innovation driver, it is up to us to share the latest technologies, trends and findings with you. That's why our experts provide their know-how via:

- Seminars
- Blended learning
- Qualifications
- Certifications

We offer this knowledge transfer at a total of seven locations throughout Germany, as well as online – and, if you wish, on-site at your company. Always up to date, always relevant to practice and always aligned with current legal regulations and standards.

LIFECYCLE CONSULTANCY

Providing maximum safety and complying with legal requirements is our top priority – throughout the entire lifecycle. In other words, from the very first planning phase of a new facility through to the optimisation of all Ex relevant processes.

Our experts provide you with completely independent and non-biased advice. We understand the importance of compliance and the need to consistently meet legal requirements, standards and regulations. That is why we fully concentrate on making your organisation legally compliant through comprehensive analyses.

In addition, our experts share practical knowledge to support and enhance your company's expertise in the field of explosion protection.

APPLICATIONS

Individual requirements need individual solutions. This also applies to explosion protection.

As consulting engineers, we are always ready to develop holistic solutions for your application. We work closely with you to understand your industry-specific requirements and translate them into explosion-proof solutions. The cooperation between our specialist teams ranges from the initial concept to the implementation of the finished solution. To achieve this, we coordinate all interfaces for the successful implementation and execution of our joint project.

On top of this, we focus on direct communication with you in each individual project phase. This enables us to guarantee that all our individual explosion protection solutions can be integrated seamlessly and with secure interfaces into your existing system architectures.
